

September 28, 2012,

Dear customer service,

We are a local team of 8th and 9th graders who train and compete in a nationwide robot competition and make every effort to share our excitement for Science and Engineering with others in the community.

Due to budget cuts we have lost most of the support of the High School robotics program and are now working hard to be able to continue the program.

A local church is granting us a room for meetings and practice, it is unfortunately empty and we have to buy and borrow everything we need from machines, hand tools, computers as well as hand soap and everyday supplies.

Any support you could provide us will be greatly appreciated.

Sincerely,

Isabelle Marchand  
Outreach & Fundraising Coordinator
